Search for pet shop:

By clicking on this option, if the customer gives his location, the app will show the location of available stores around the customer where he will find all the belongings of his pet.

Search for adaption:

In adoption option, when the customer wants to adopt a pet, he will see the contact details of the person from whom he will adopt along with his pet details or he/she can post for their pet for adoption if they want.
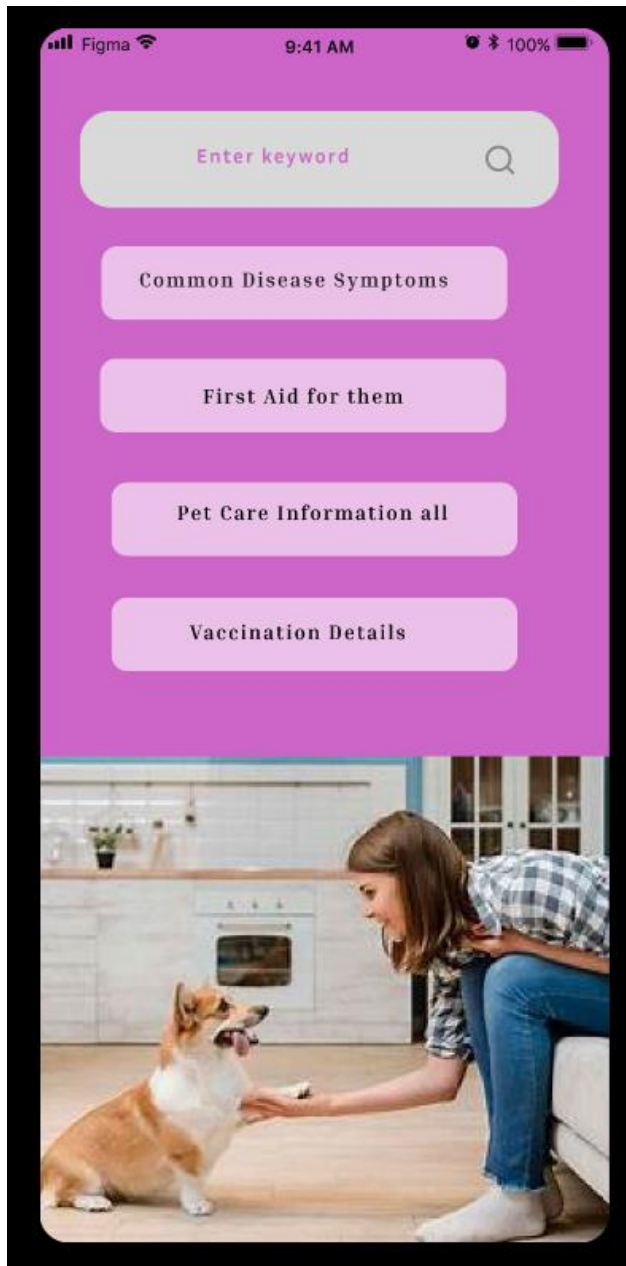

Foster Home:

With the Foster Option, If the customer shares his location he can view homes available for Foster at very low prices with contact lists around his house. If Foster Price seems too much for him, then he can post help for Foster himself if he wants.
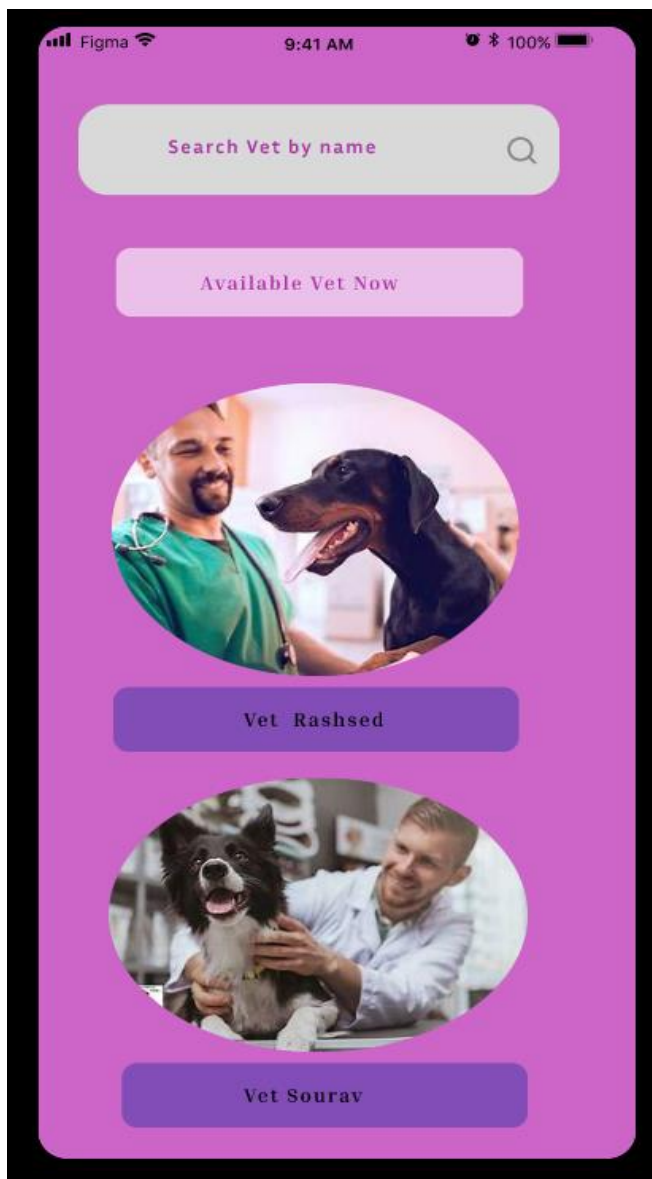

Pet care information:

This option shows the customer the symptoms of common diseases of his animal, and what he should do as first aid if these symptoms occur. And also, the information on when vaccinations should be given can be found here.
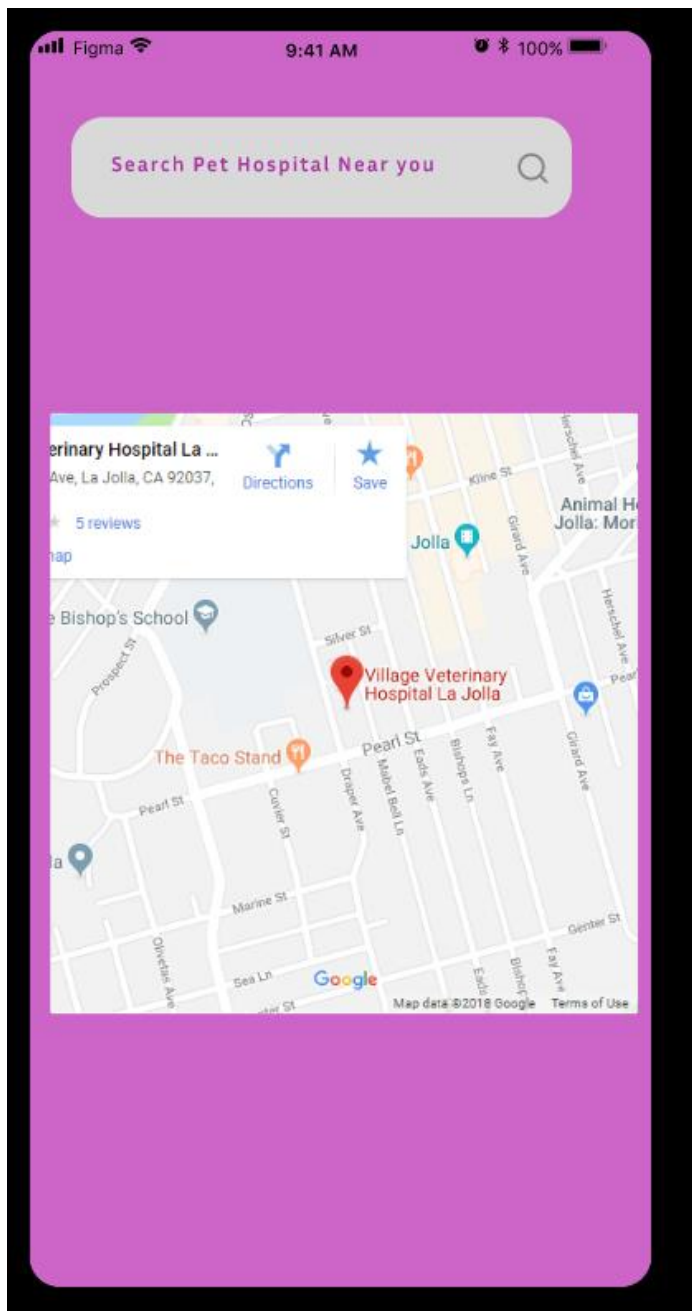

Contact with vet:

In this option, if an emergency doctor is needed, the customer can see which doctors are available in online by clicking on contact with Vet. And there will be all kinds of payment options with very little payment they can book the appointment of doctors. And They will be able to contact with doctor by video call and call or text option after taking appointment and approved by doctor.

Search Animal hospital:

In this option if the customer shares his location, he will see the location of the hospital near him.

Donation:

In this option, anyone can donate to a non-profit organization that works to shelter street animals and keep them healthy. Admin will verify these donations post before going public. Also can ask for help for any street animals by creating post.
